FRONTLINE TOP SPOT FOR CATS

For use on cats only. Do not use on dogs or rabbits.
For use on kittens and cats from 8 weeks of age.

INDICATION

➢ A monthly spot-on flea and tick preventative treatment.
➢ Assists in treating Flea Allergy Dermatitis (FAD).
➢ Completely waterproof.
➢ Easy to apply.
➢ Effective against adult fleas, American dog ticks, brown dog ticks, lone star ticks, deer ticks and chewing lice.
➢ Fipronil is the active ingredient which takes just a day to get rid of adult fleas and ticks.
➢ Long lasting protection.
➢ Prevents re-infestations by killing life stages of these pests for one month.
- Prevents sarcoptic mange in kittens and cats.
- Recommended for all cat breeds.
- Saves the kitty from painful lice.

**COMPOSITION**

<table>

<tr>
<th>Fipronil</th>
<th>9.70%</th>
</tr>
</thead>
</table>

**RESIDUAL EFFECT**

A monthly spot-on treatment that is effective against fleas, ticks and chewing lice. It kills adult fleas, American dog ticks, brown dog ticks, lone star ticks, and deer ticks within a day's time of application. It also assists in treating Flea Allergy Dermatitis (FAD) and prevents sarcoptic mange in kittens and cats.

**WARNING**

- Do not use it on debilitated or aged cats.
- Do not use this treatment in conjunction with other pesticides on dogs.
- For external use only. Never apply it in the eyes or mouth of the kitty.
- Keep the product away from the reach of children and other pets and do not allow them to get in contact with the treated dog till the application site dries out completely.
- Never use this treatment on cats that are allergic to Fipronil.
- Never use this treatment on kittens younger than 8 weeks of age.

**PRECAUTIONS**

- The application site after administering the spot-on treatment may appear to be wet or oily for a maximum of 24 hours. This is normal but do not allow anyone to touch the treated site until it completely dries out.
➢ If you accidentally touch the area, be sure to completely wash your hands with soap and water.

-------------------------------------------------------------------------------------------

DOSAGE

1 pipette of 0.5 ml per cat.

--------------------------------------------------------------------------------------

METHOD OF APPLICATION

➢ Use as directed by your veterinarian.
➢ Recommended for kittens and cats at least 8 weeks of age.

<table>
<thead>
<tr>
<th>Step-1</th>
<th>Hold the pipette in an erect position. Tap the thin part of the pipette and check that the contents are inside the principal body of the pipette. Unlock the snap-off top of the product pipette along the graded line.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Step-2</th>
<th>Unlock the snap-off top of the product pipette along the graded line.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Step-3</th>
<th>Keep the tip of the pipette on the cat's skin and compress softly at multiple spots on the skin preferably at two spots, one at the base of skull and second 2-3 cm further back.</th>
</tr>
</thead>
</table>

➢ This treatment needs to be repeated on a monthly basis on the same date.
STORAGE AND DISPOSAL

➢ **Storage:** Store the product at a room temperature below 30 degrees Celsius. Store unused product in original container only, out of reach of children and pets.

➢ **Disposal:** Mask blank container in paper and place in garbage.

PESTICIDE DISPOSAL

➢ Do not contaminate water, food, or feed by storage and disposal.

➢ Never empty product in indoor or outdoor drain.

CONTAINER DISPOSAL

➢ **If the container is empty:** Never re-use or refill the container. Keep it in trash or offer for recycling if the option is available.

➢ **If the container is wholly filled:** Contact your local solid waste agency for disposal instructions. Never keep the new product near any indoor or outdoor drain.

FIRST AID

Keep the product container or label with you while calling a poison control center or doctor or while going for the treatment:

➢ **If the treatment is swallowed:** Contact poison contact center or doctor quickly for getting their advice. If the person is able to swallow, give him/her a sip of glass of water. Never induce vomiting until and unless it has been recommended by the poison center or doctor. If the person is unconscious do not give anything by mouth.

➢ **If the treatment gets into the eyes:** Keep the eye open and rinse slowly and softly with water for 15 to 20 minutes. If the person is wearing contact lenses, remove it after 5 minutes and continue rinsing the eye. Call the
doctor or poison control center for advice.

➢ **If the treatment affects the skin:** Wash the spot with plenty of soap and water. Take the help of a doctor in case if the affected being is a person. For the dog contact your veterinarian immediately.

---

**SIDE EFFECTS**

In certain cats, there may be temporary redness or itchiness at application site. If the application site is licked by the cat she might droll before the treatment dries. If it persists for several hours, bathe the cat and contact your veterinarian.
